

BURN FLOKI (\$BFLOKI)

White Paper

Welcome To Burn Floki Token

First and foremost, thank you from the development team to consider this project. Our approach will be much different than the typical projects that run on the field. We will be a double edged sword that will combine the utility purpose then combine our utility to funding projects that will become Security asset based.

The Crypto arena is changing very quickly, the NFT craze and Metaverse is a great approach, but not enough to capture more than 12% of **who make up** the Crypto portfolio. That's why \$BFLOKI COIN was created, to cultivate a Utility integrated Security Token Protocol.

Regulation is coming, we understand that. Today is no better time than think outside the common crypto currency box and really channel energy into a project, create jobs and **contribute to our** taxation system. **Thank you from the \$BFLOKI COIN family.**

Astro Burn Floki Token will be created for the owners of the NFT holders. The NFTs will be introduced into the Metaverse then eventually the announced Constructaverse.

In the constructaverse, heavy equipment NFTs will be made for sale, the NFT owner will then be able to mine Astro Burn Floki Token as part of a simulated mining operation.

What Is Burn Floki Token ?

Which would make global transactions easier, faster, and more secure, putting control directly in the hands of the concerned parties. This could also eliminate banks and money transfer services. Securitizing data, identity protection, creation of a decentralized economy, and storing personal data securely are a few of the initial purposes for which the blockchain technology was brought to life. Cryptocurrency is a growing mega-trend, which is being recognized worldwide and is being adopted for daily transactions. Nearly every global bank is experimenting with blockchain technology as they try to unleash the cost savings and operational efficiencies it promises to deliver. Decentralized storage platform secured by blockchain technology.

Back up \$BFLOKlers, for an effective supply chain system to work, roadways, building structures and people are required to construct the pathways and centers so all goods and services can be transported and shipped. This is where the construction and mining industry comes in. Now, it's too large of an industry to give any kind of description in detail but let's leave it at this, the workers of construction and mining are incredible women and men who go at their jobs every day, and give it their best yielding results to building roads, Bridges, buildings, underground systems, electrical power systems and much more. So, now that we have recognized the importance of construction to the supply chain, why \$BFLOKI COIN?, well its simple, if you evaluate the importance of the actual construction process, then think that there are industries from safety boot products, mining and construction equipment and parts, clothing to band-aides and even food just to name a few. Our apologies if we have missed other vital industries, but you won't be missed when \$BFLOKI COIN finds you. \$BFLOKI COIN will connect and merge with these industries and become a currency that can be used within their company commerce used by workers **who** will build a transactional environment using \$BFLOKI COIN.

This is why the Supply Chain System cannot survive without the veins of

construction. They live and work together.

Why Burn Floki Token?

Burn Floki Token is a secure, public and decentralized cryptocurrency, built with on DeFi platform. Privacy and security come naturally from using Burn Floki Token. It is the best solution for those who want to keep their financial privacy from traditional platform.

Burn Floki Token full-stack DeFi ecosystem, changing the embarrassing situation of the existing meme-type tokens lacking in ecology, and forming a community corresponding to the exclusive financial ecology.

All transactions enjoy the benefit of Blockchain security. Blockchain has emerged as one of the most disruptive technologies in recent times and has addressed many of the major security issues concerning financial transactions.

Instant transactions are provided all around the world by the Burn Floki Token Network, they are totally untraceable, and they don't require any additional fees.

Burn Floki Token is a scalable digital asset offering the instant, on-demand transactions required in today's world. Burn Floki Token transactions typically occur in a matter of seconds, offering a unique model of exchange that is safe and secure.

How Does \$BFLOKI Utility Token Work?

Through \$BFLOKI COINs asset builder protocol [roadmap](#), individual projects will take shape. Once the project has been announced and has launched, a new asset project will be revealed all while each project currently online and operating. Let's explain how this works.

Burn Floki Token Transactions

Unlike fiat money transactions, where your money is processed through an intermediary, bank, or financial institution, transactions between Burn Floki Token users are carried out over the Internet which makes the transactions much more reliable.

Our Vision

Our vision is to inherently develop a project which comprises of virality and humour to ensure that the community will stay interested.

Burn Floki Token 's purpose is to offer a secure ecosystem, giving them the opportunity to sleep well at night without fear of being conned. The team is always active on Telegram, where they are eager to engage with their users through voice chat or text. In this place, the team values integrity and honesty, and they will work endless hours to demonstrate it.

Our Mission

Burn Floki Token has developed a competitive public blockchain based on DeFi platform and Burn Floki Token coin (\$BFLOKI) will be sold on different exchanger platforms. The consensus algorithm adopted from the Byzantine fault tolerance based delegated proof of stake (BFT-DPos) assures the verification of transactions on the Burn Floki Token Blockchain as well as its performance.

The protocol we are working on is a set of the standards used on DeFi platform. It is also compatible with all of the blockchain contracts written by a high-level programming language and implements DeFi protocols.

Our mission is to enable the next generation of many-to-many transaction on decentralized applications. By building on top of existing blockchains, our applications will be able to be deployed in a peer-to-peer environment, with complete fairness, transparency, and visibility. We believe Burn Floki Token is revolutionary and will change everyone's expectations of how fair and fast trading can be.

Technical advantages of Burn Floki Token

Burn Floki Token will always focus on delivering real, real-time and sustainable data value to users, expanding the ecological boundary of trusted sharing.

1) Information access

Users can maintain their own digital assets at any time, and set up corresponding modes for different types of digital assets, including private, public, charging, etc., as well as pricing digital assets in the charging mode.

3) Improve transaction speed

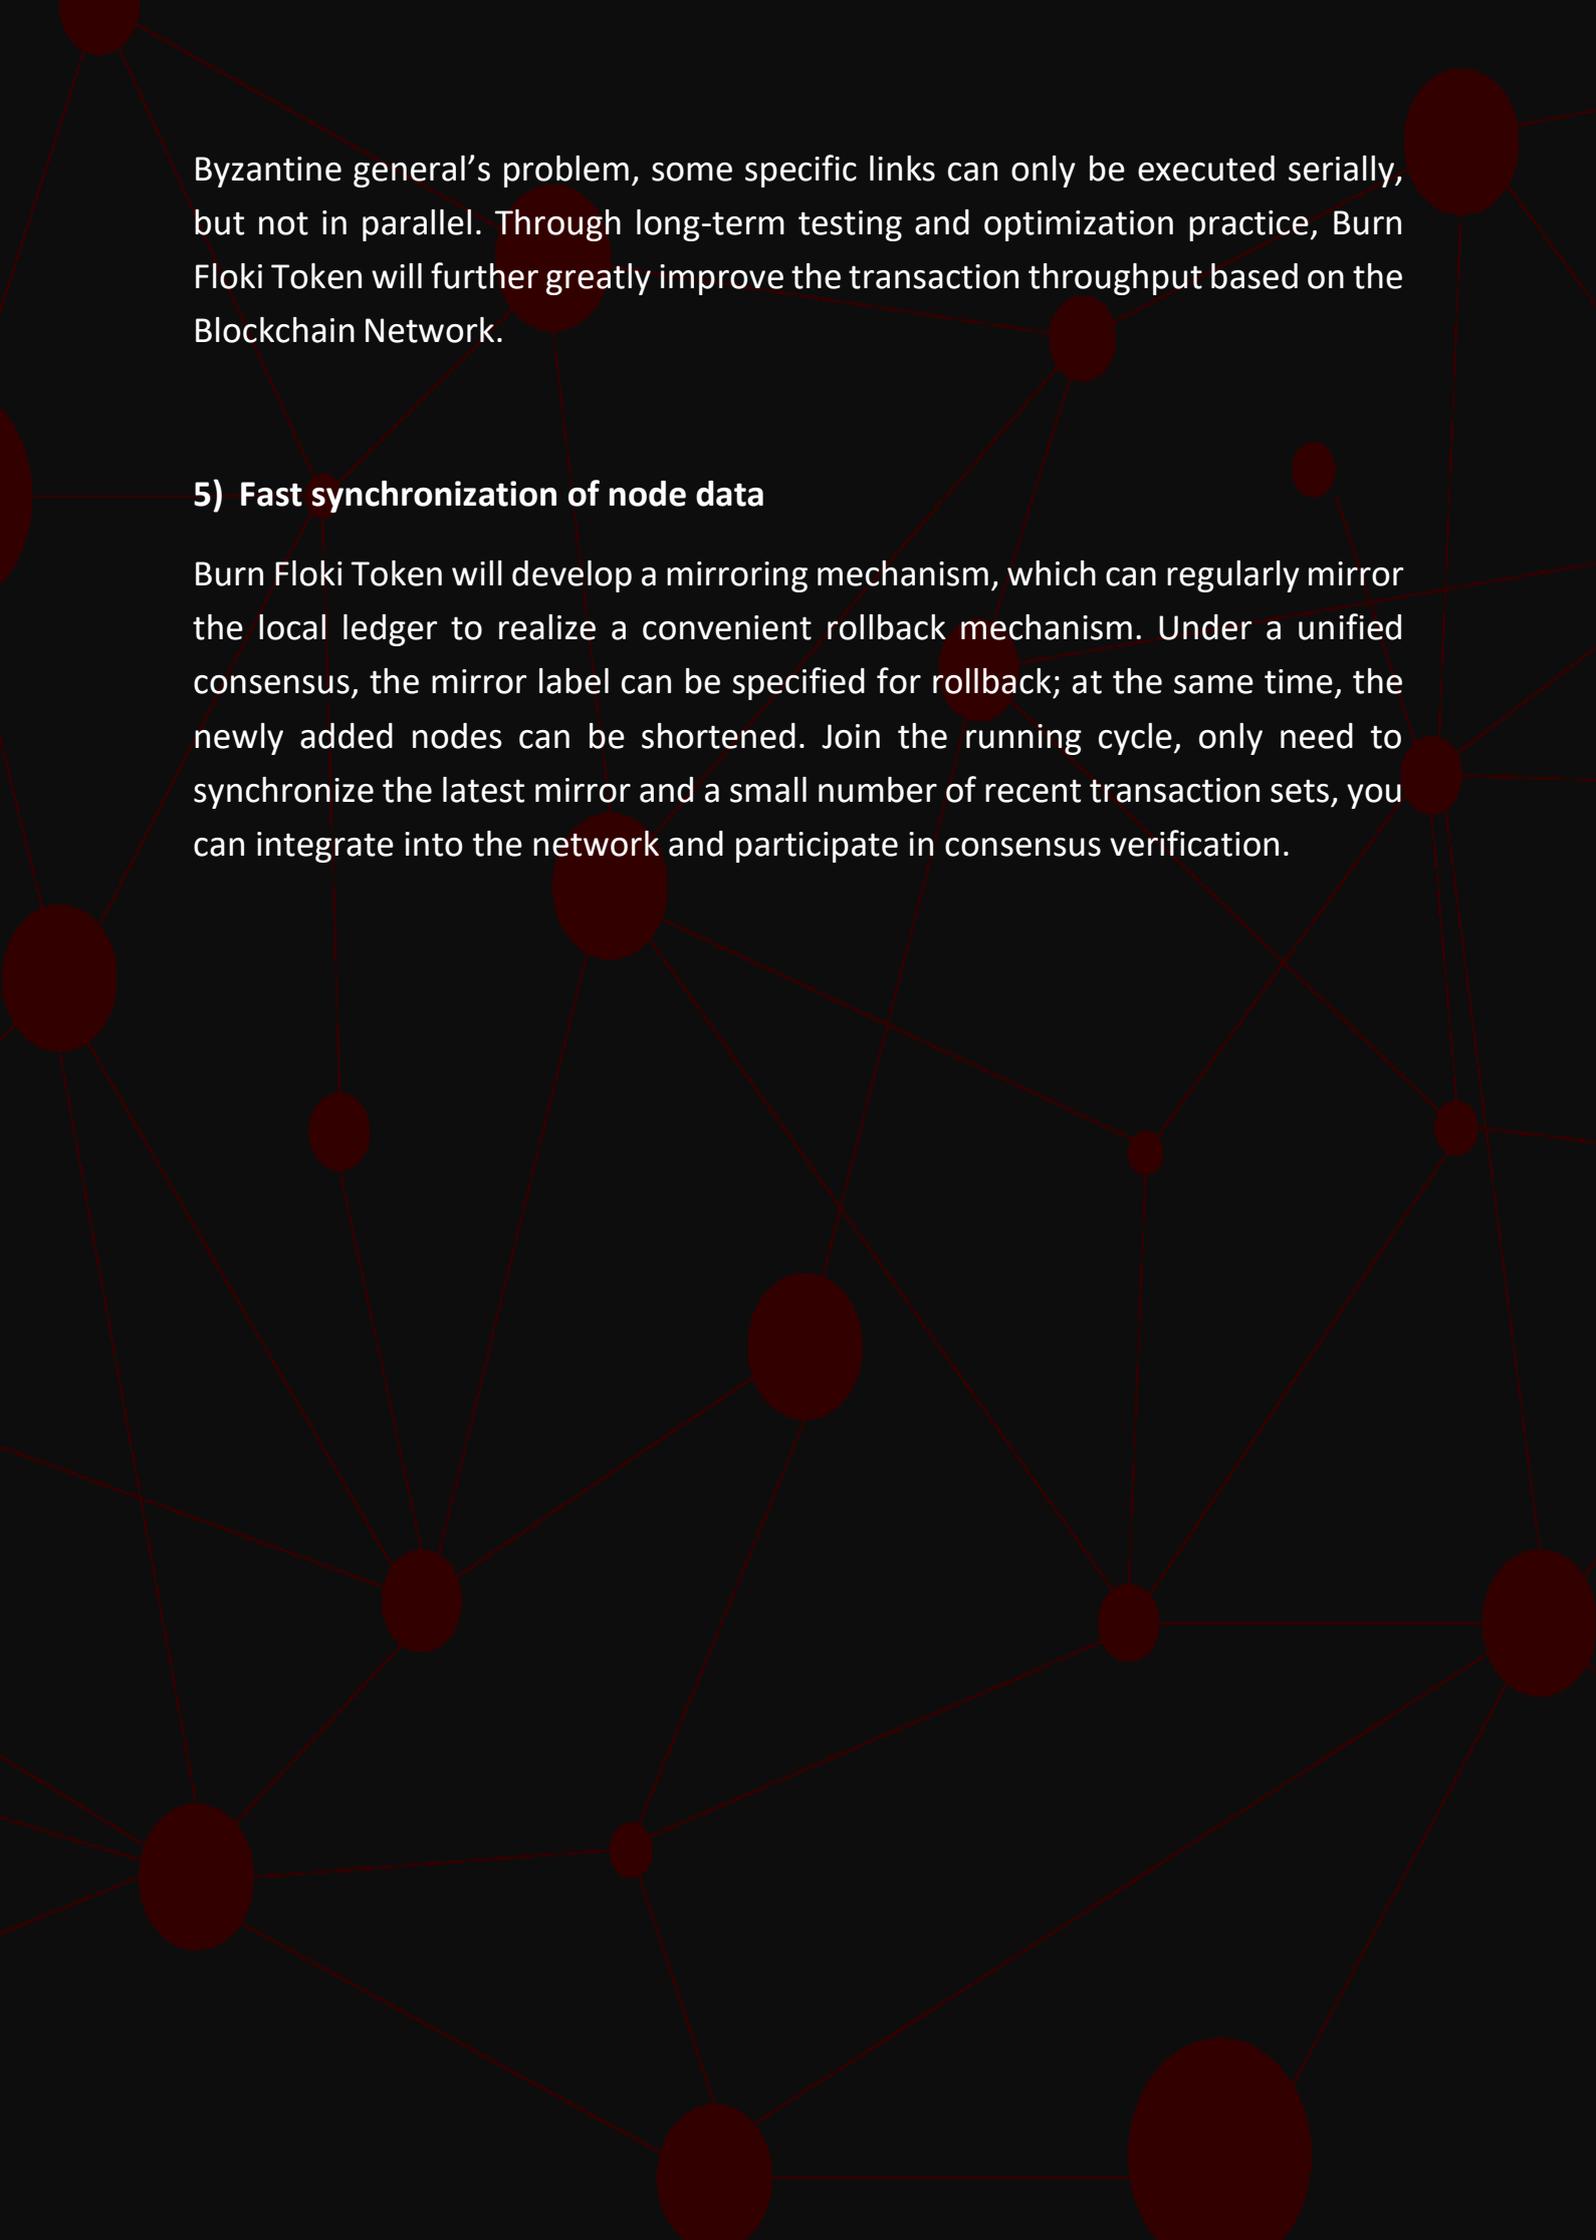

Through the optimization of key links such as signature algorithm, ledger structure, data operation, serialization, consensus mechanism, and message diffusion Burn Floki Token will achieve fast transaction verification in seconds. Satisfy the user experience of most DeFi application scenarios.

3) Increase data storage

The double-entry bookkeeping mode of the blockchain has accumulated a large amount of data in the continuous application of the system, resulting in a decrease in the running speed. Burn Floki Token will implement separate storage and table- based storage mechanisms to achieve mass storage of DeFi data.

4) High throughput

The essence of blockchain is a distributed shared accounting technology, and its distributed characteristics are mainly reflected in distributed consistency rather than distributed concurrent processing. In order to ensure data consistency and prevent

A network diagram with red nodes and lines on a black background. The nodes are represented by circles of varying sizes, and they are interconnected by thin red lines, forming a complex web of connections. The overall aesthetic is technical and digital.

Byzantine general's problem, some specific links can only be executed serially, but not in parallel. Through long-term testing and optimization practice, Burn Floki Token will further greatly improve the transaction throughput based on the Blockchain Network.

5) Fast synchronization of node data

Burn Floki Token will develop a mirroring mechanism, which can regularly mirror the local ledger to realize a convenient rollback mechanism. Under a unified consensus, the mirror label can be specified for rollback; at the same time, the newly added nodes can be shortened. Join the running cycle, only need to synchronize the latest mirror and a small number of recent transaction sets, you can integrate into the network and participate in consensus verification.

\$BFLOKI – The Native Token of Burn Floki Token

Dogecoin(DOGE), Shiba Inu (SHIB), and Dogelon Mars (ELON) are among the most successful Meme projects among others. Each has provided valuable features to their users and attracted liquidity into their protocols. The native tokens of DeFi protocols have shown tremendous potential for upside price appreciation.

The Burn Floki Token coin economics are modelled similarly to these successful Meme projects. Burn Floki Token coin can be used to access advanced features within ecosystem while also providing holders with opportunities to generate greater interest.

Token Summary

Tokenomics

#BurnFloki is a Decentralized BSC Meme Token. Memes are the Future currency of the #MemeVerse. Be a Part of the #Memeconomy. \$BFLOKI is Free for everyone to purchase, just go and buy on Pancakeswap for Moooon 🚀🚀🚀

Symbol: \$BFLOKI ✨

Network: BSC

Fixed Token Supply:
1,000,000,000,000,000 ✨

Roadmap

PHASE 1

- Website launch
- Team KYC
- Audit
- Full Marketings
- Fair Launch
- Coingecko/CoinMarketCap

1000+ Holders Growth Target

PHASE 2

- Website Redesign (MetaVerse)
- NFT Airdrop to Top 2500 Holders
- Play2Earn Racing Game Demo
- Cex Listing
- Apple MacBook Pro Giveaway

4000+ Holders Growth Target

PHASE 3

- BurnFloki Swap development
- BurnFloki Dashboard
- BurnFloki Game Launch
- Celebrity Onboarding
- Solid Big Partnerships

10000+ Holders Growth Target

PHASE 4

- Top Tier CEX Listing
- Tesla giveaway
- Community Votings on Marketing Funds
- Presentation of a New RoadMap

50000+ Holders Growth Target
